

TIME ADJUSTABLE ELECTRONIC DIMMER

#1932-V1.00

Fields of Application

- Electric Infrared Heaters
- Electric Radiators
- Electric Heating Blankets
- Electric Quartz Heaters
- Electric Foot Warmers

Main Features

- On/Off control with pushbutton
- 15, 30, 45 minutes timing selection with button
- Continuous operation mode without timer
- 0% ... 100% range precision dimmer feature
- Microprocessor controlled design
- Safe plastic box

General Features

It is a handheld, easy-to-use device designed for electric heaters. It can safely control loads up to 500W. With 3 different time settings, the device can be turned off automatically after the desired time. In the last 60 seconds of the set time, the LEDs flash and give a notification. If the button is pressed again at this time, the time is restarted. A wide range of precise power selection can be made with the rotary step adjustment on it. It can be used by directly connecting electrical cables to the electronic card inside the plastic box.

Technical Specifications

Supply Voltage	230V~ 50Hz
Output Power	10W ... 500W
Storage Temperature	-20°C ... +80°C
Operating Temperature	-10°C ... +60°C
Connections	Enerji Giriş: 5.08mm 3P Klemens Yük Çıkışı: 5.08mm 3P Klemens
Timing	15, 30, 45 dakika
LED States	Cihaz Kapalı 15 Dakika Zamanlama 30 Dakika Zamanlama 45 Dakika Zamanlama Sürekli Çalışır Durumda
Accessories	Enerji Giriş Kablosu Yük Bağlantı Kablosu
