MYSIA Electric Electronic
Computer Software A.Ş

About Our Founder

M. Tankut KURUL
CEO and Founder

As MYSIA Elektronik, we are proud to leave behind a successful 10 years. We aim to continue our adventure, which started in Türkiye in 2013, in the European and world markets with the investments we made in Bulgaria.

We design products that contain elements such as electronics, mechanics and software from scratch, regardless of sector and scale, we develop your existing products and modernize them in accordance with the trend. However, thanks to our experience in production technologies, our investments and our supply network, we respond to requests in all volumes.

Considering that the most important rule in the design process is to understand the idea well and to fully understand the customer demands, we conduct extensive research on the product and give the right answers to the demands of our business partners. Thus, we have a wider perspective and we can realize world-class designs.

We add value to your idea by keeping in mind our motto "No unrealized idea is valuable" that will add value to you and your business!

Regards.

About Us

WHO ARE WE?

We are a creative company made up of experts who are experienced in product design and enjoy working with them. Our goal is to turn great ideas into real products. We have been doing this work with pleasure since "Friday 19.07.2013" and we are constantly expanding our design portfolio.

We have implemented many ideas with the determination of the electronics engineers, software developers and 3D design experts in our staff. We have an extraordinary design team that enables the works we started with charcoal sketches to turn into real products after a while. We are confident that you will enjoy working with us and be impressed by our energy in good product development.

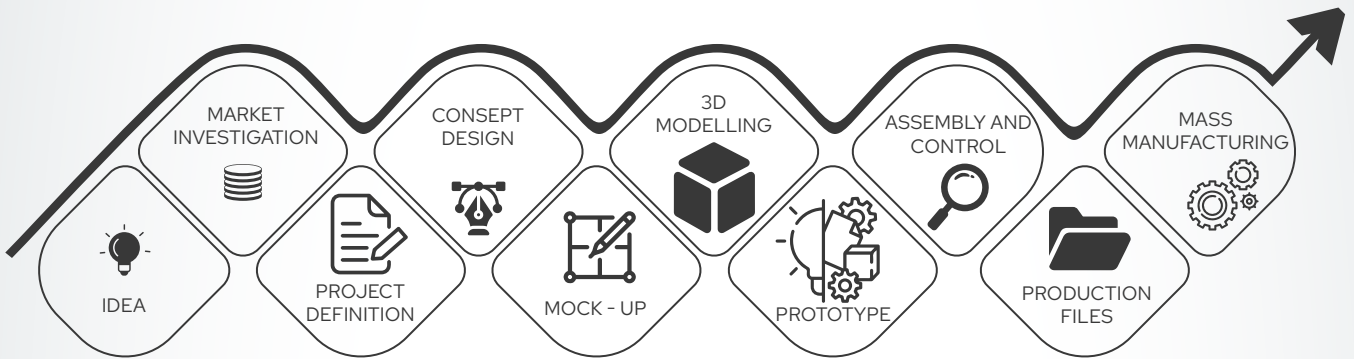

Any idea is worthless.

Let's add value to your opinion.

HOW ARE WE DOING?

We design products that contain elements such as electronics, mechanics and software from scratch, regardless of sector and scale. Or, we develop your existing products in terms of low cost, efficiency, functionality, aesthetics, ease of production and modernize them in accordance with the current trend. In addition, thanks to our experience in production technologies, equipment and domestic / foreign partner companies, we also provide production support in the desired volume.

DESIGN PROTOTYPE MASS PRODUCTION

We can provide consultancy or production services in the design, prototype production and mass production stages of microprocessor controlled electronic circuits.

SOFTWARE

We can offer innovative solutions for the development of mobile / web / desktop software and improvement of existing software tailored to your needs.

3D MODEL RENDER

We can support renders, models, prototypes, molds and mass production that can be converted into 3D models with computer-aided designs.

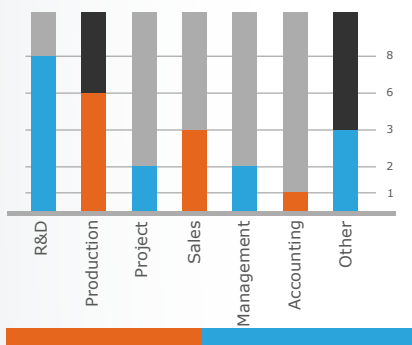

What's Our BUSINESS SERVICE

About Of Our

STAFF DISTRIBUTION BY DEPARTMENTS

Together with 12 Engineers and 7 Technicians, we serve with an average of 25 personnel who are graduated and experienced from different branches. We care about the share of each individual in our team in the success of our company. We attach great importance to regular internal and external vocational trainings in order to ensure that they are an effective part of the culture of contributing to growth and development and producing results that will leave a mark.

About Of Our

CLOSE FUTURE

We have successfully established our new company in Bulgaria.

Our goals this year;

01

Establishing and opening a design and project office in Sofia, Bulgaria.

02

Establishing our production facility in Plovdiv, Bulgaria, inaugurating and starting production.

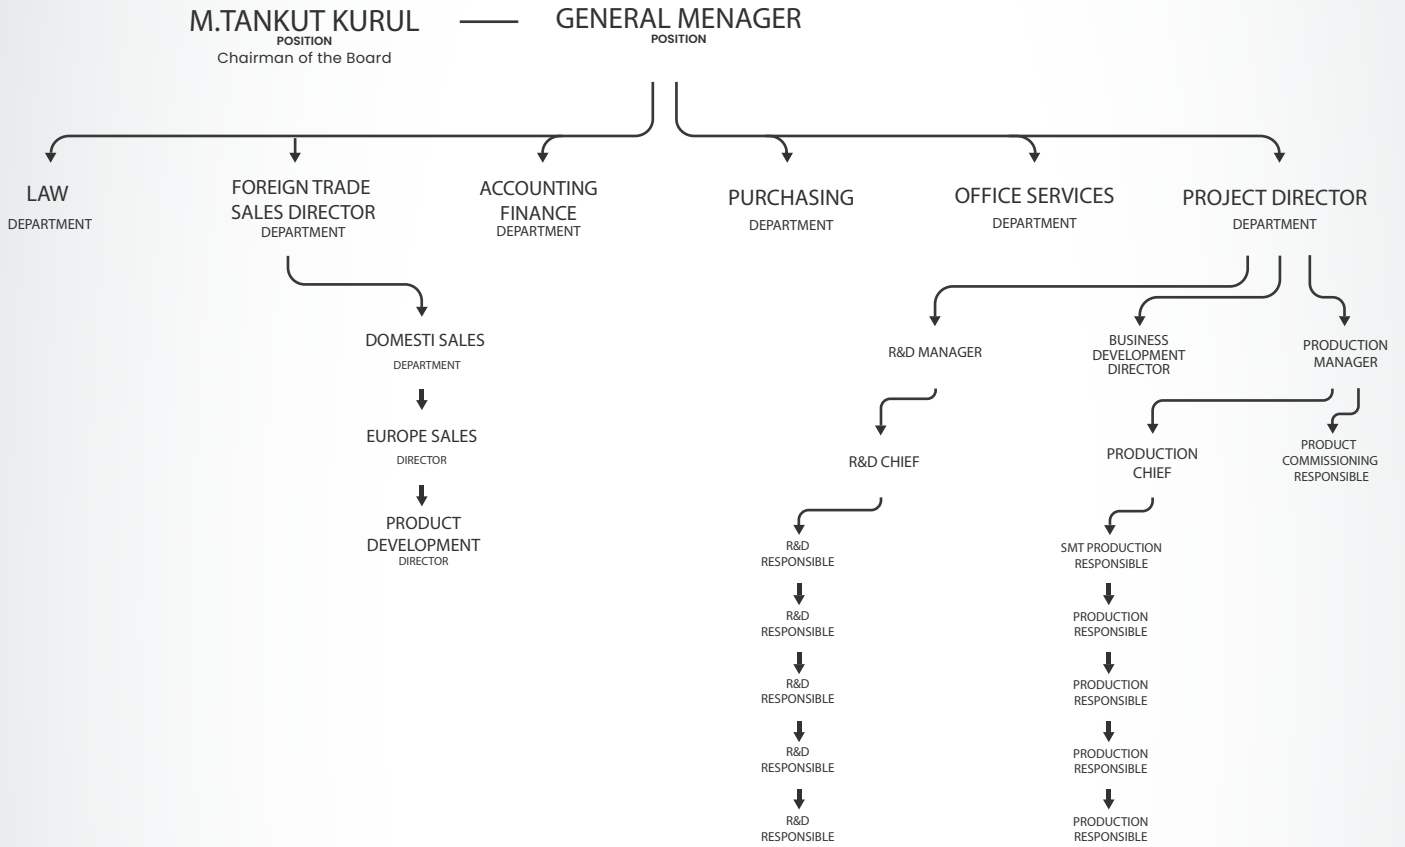

Any unrealized idea is worthless.

Let's add value to your opinion.

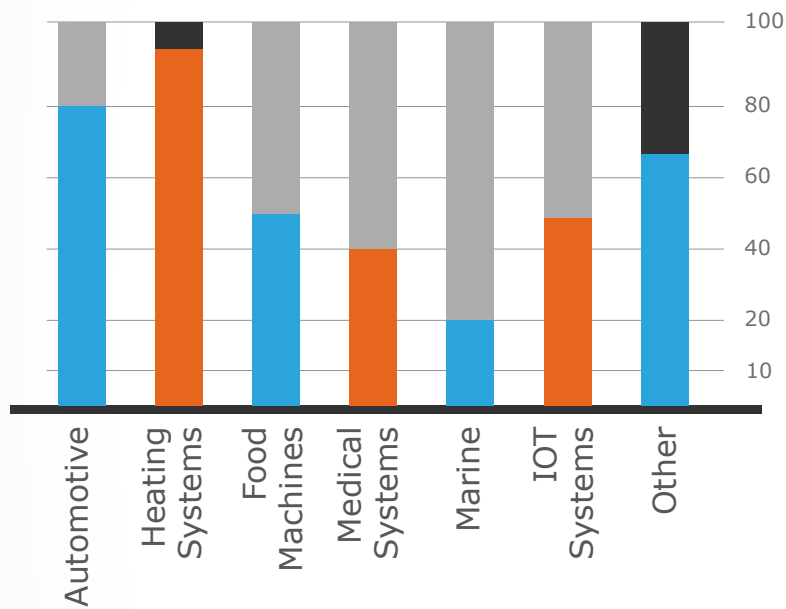

Organization CHART

Sectoral ACTIVITIES

We are happy to have provided design and production support to many companies in different sectors. The positive reference of our customers, who give us the opportunity to work once and continue their cooperation in all their projects, is important to us. Our main goal is to be together for life in R&D studies and production processes.

We develop ourselves a little more in every project we carry out and we benefit from these experiences in new projects.

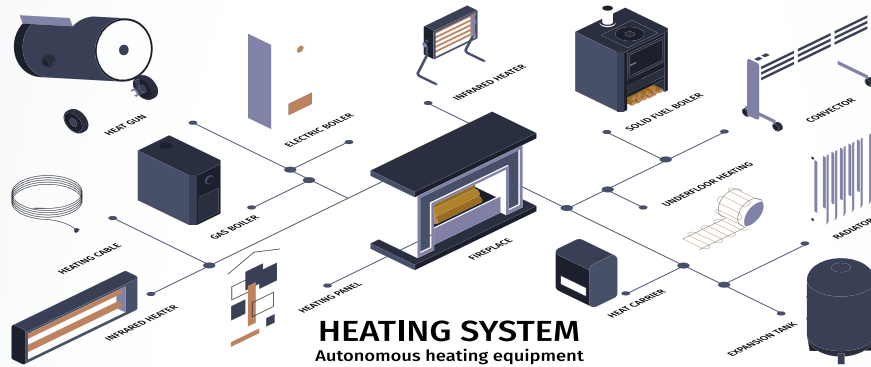

Any unrealized idea is worthless.

Let's add value to your opinion..

Heating Systems

CUSTOMERS & PROJECTS

hoşseven

Fields of activity

It manufactures LNG/LPG fueled outdoor and industrial heaters, pellet stoves, fireplaces and wood/coal stoves.

Projects

- Ceramic Radiant Heater Control Card
- Tubular Radiant Heater Control Card
- Air Apparatus Control Card
- Natural Gas Stove Control Card
- Pellet Stove Control Card
- Central Heating Control System Card

alaz efekt

Fields of activity

It produces electric artificial flame-like decorative fireplace systems. It provides wood visual and light reflection and flame visual as well as low power electric heating.

Projects

- IR Controlled Fireplace Control Card
- Bluetooth Controlled Fireplace Control Card

warmhaus

Fields of activity

It produces products such as Combi Boilers and Accessories, Radiator and Towel Warmer, Condensing Boiler and Water Heater.

Projects

- Combi room thermostat with wireless and mobile application support
- Combi TFT touch screen control panel

bursa şömine

Fields of activity

It produces electric decorative fireplace systems that provide flame effect by using light and fogging with cold steam technology.

Projects

- Fireplace Control Card with IR Control and Touch Keypad

ÇUKUROVAISI

Fields of activity

LNG / LPG fueled or electric outdoor and industrial heaters, Cafe-Restaurant heaters, stadium heating systems, mosque heating systems, electrical heaters.

Projects

- Electric Outdoor Heaters
- Ceramic Radiant Heater Control Card
- Tubular Radiant Heater Control Card
- Central Heating Control System

MIRA

Fields of activity

LNG / LPG fueled outdoor and industrial heaters, electric heating systems.

Projects

- Ceramic Radiant Heater Control Card
- Tubular Radiant Heater Control Card
- Hot Air Generator Control Card
- Electric Heater Control Card

Automotive

CUSTOMERS & PROJECTS

We provide support to automotive supply industry companies and companies that provide infrastructure for the production of automotive equipment, in the design and production of electronic systems. In addition, we design systems that can perform visual, mechanical and dimensional tests for the quality verification of mechanical automotive parts.

ELOPAR
group

Fields of activity

It produces project-based solutions on Harness production and test equipment used in the automotive industry.

Projects

- Cable Harness and Test Systems
- Automotive Electronics Test Systems
- Automotive Parts Mechanical and
- Electronic Verification Systems

fkt

Fields of activity

It is a subsidiary of the German KIEL company, which provides design and production services for Bus and Train passenger seats. It works on modern and upper segment seats.

Projects

- Seat Heating and Cooling Systems
- Seat Reading Lamps
- Passenger Presence and Belt Buckle Control Systems
- USB Type A/C Wired Chargers
- Wireless Chargers

TECHNOSEAT

Fields of activity

It operates in the commercial vehicle, railway and cinema / conference seats sector.

Projects

- Passenger Presence Sensors
- USB Type A Wired Chargers
- Wireless Chargers

Fields of activity

MAN is a German industrial organization. It is mostly known for the production of trucks and buses. MAN's working areas; commercial vehicles, diesel engines, turbo machines and industrial services.

Projects

- Intelligent Passenger Seat Control Systems
- Passenger Seats Central Monitoring and Management System
- Passenger and Attendant Mobile Applications

ORHAN HOLDING

Fields of activity

Orhan Holding is the first preferred global supplier for its worldwide customers in the automotive industry.

Projects

- Gasoline tank cap electromechanical push push open close system

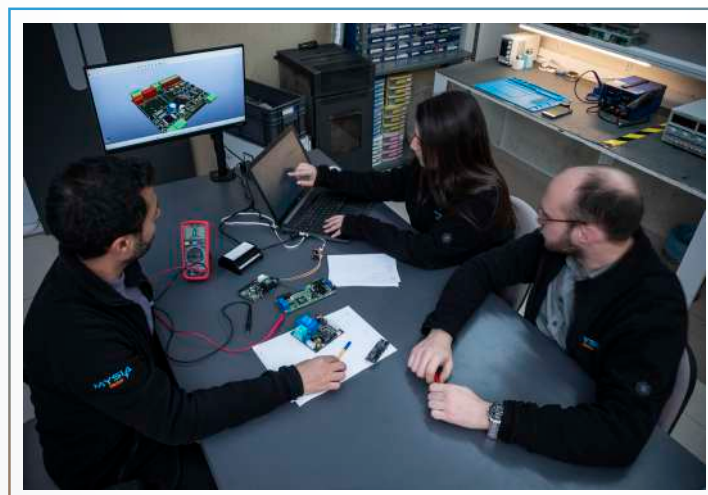

MILARA

Fields of activity

Milara Bulgaria is making Electric Vehicle manufacturers in Plovdiv.

Projects

- Wire Harness Group
- Tail Light PCB Module
- Controller Fan Board Module
- HVAC Module
- CEM (Main Board Module)

Other

CUSTOMERS & PROJECTS

Food | Medical | Machines | Marine Products | Entertainment | Toy | Agriculture & Livestock | Automatic Doors | Test Equipment | Home & Office Tools | Renewable Energy | Industrial Control Systems | Kitchenware | Industrial Kitchens | Hygiene Devices | Air Conditioning and Cooling Systems | Remote Monitoring | Data Collection | Wireless Communication

KIRAC
GROUP

Fields of activity

Kiraç Information Communication Technologies Inc. As a company, it produces nurse call systems and hospital guidance systems under the ZKR brand.

Projects

- Wired Nurse Call Panel
- Bedside Call Buttons
- Wireless Nurse Call System
- Information & Guidance Screens
- Data Transfer Stations

France

NA-CEO

Fields of activity

It is a French company that designs and produces innovative products in the automotive, furniture and luxury kitchen sectors.

Projects

- Motorized Automatic Enclosure Mechanism for Folding Ladder

TESUP

Fields of activity

It is a London-based company that produces easy-to-install windmills and solar energy systems in a small area.

Projects

- Wind Turbine Charge Controller
- Wind Turbine Alternator Test Systems

schmelz

Fields of activity

It manufactures movable automatic door mechanisms and accessories. It is focused on the manufacture and sale of sliding doors and swing doors.

Projects

- BLDC Motorized Sliding Door Control Card
- Linear Motorized Sliding Door Control Card
- DC Motor Swing Door Control Card

MARINE

Fields of activity

It manufactures portholes and ship window systems used in the maritime industry.

Projects

- Ship Glass Heater Thermostat Controllers

CANCAN
• SINCE 1958 •

Fields of activity

It mainly produces fruit peeling and juicing machines.

Projects

- Automatic Orange Juicer Control Board
- Pomegranate Press Control Card
- Fruit Peeler Control Board
- Juicing Machine Control Board

We develop tailor-made projects and provide design and production support in different areas such as customer demands. You can see some of these companies below.

Any unrealized idea is worthless.

Let's add value to your opinion.

KALİTE POLİTİKAMIZ

MYSIA Electric
MYSIA ELEKTRİK ELEKTRONİK BİLGİSAYAR YAZILIM SAN. VE TİC. A.Ş.

Sahip olduğumuz bilgi, beceri, deneyim ve donanımları kullanarak, bir ürünü baştan sona aynı çatı altında tasarlayıp üretelimiz. Böylece daha kısa sürede, en iyi tasarımı ve ürünü ortaya çıkararak hedefliyoruz. Müşterilerimizi fikir ve önceliklerini iyi anlayıp üzerine bir seyer katarak, her zaman beklentiden fazlasını sunuyoruz.

Kalite yönetim sistemimizin ISO 9001 standardının gereklerini yerine getirecek şekilde dokümanite edilmesi, belgelendirilmesi ve sürekli iyileştirilmesi,

Toplam Kalite felsefesini esas alarak, takım ruhu içerisinde şirket ve birim hedeflerine ulaşılması,

İş süreçlerimizin öz değerlendirme süreci ile gözden geçirilmesi, performansımızı geliştirecek öncelikli yaklaşımların belirlenmesi,

Sürekli iyileştirme yaklaşımı doğrultusunda tüm süreçlerimizdeki verimliliğin uluslararası düzeyde rekabet edilecek seviyeye yükseltilmesi,

Yeniliği ve yaratıcı yaklaşımların cesaretlendirilmesi, teknik ve davranışsal yetkinlikleri artıracak eğitimlerin gerçekleştirilmesi yönünde faaliyetlerimizi Çevre, İş Sağlığı ve Güvenliği, Bilgi Güvenliği Yönetim Sistemleri ile birlikte bütünlük bir şekilde yöneterek, elektronik tasarım ve üretim sektöründe kalite açısından öncülüğümüzle örnek bir kuruluş olmak için çalışıyoruz.
